WHAT IS MICROFIBER?

Microfibre is a synthetic material composed of two polymers. When joined together in different quantity percentages, these polymers develop into a single thread which is thin and highly resistant.

Polyester electrostatic features allow the microfibre to catch and retain all types of dust.

Polyamide has great absorbing power and, together with water use, eases dirt removal and the degreasing of surfaces without leaving any marks or stains.

Microfiber specific uniqueness is its **EXTREMELY THIN STRUCTURE** and **HIGH DENSITY**. These characteristics provide the microfibre with its **MECHANICAL STRENGTH** and its **POWERFUL ABSORBING POWER**.

THICKNESS

Microfiber is twice as thin as silk, three times finer than cotton having a density equal to or less than 1 decitex*.

Due to its thinness, **THE MICROFIBER THREAD ENTERS DEEP INTO CRACKS OF THE MOST IRREGULAR SURFACES,**

Able to remove even the smallest particles of dirt and dust.

* the Decitex "dtex" corresponds to 1 g over 10 km and indicates how many meters of a certain quantity are contained in one gram of weight.

THICKNESS OF THE YARNS:

- **POLYPRO MONOFILAMENT** (46 dtex) \varnothing 80 μ m
- **HUMAN HAIR** (51 dtex) \varnothing 70 μ m
- **POLYESTER MONOFILAMENT** (44 dtex) \varnothing 64 μ m
- **WOOL** (26 dtex) \varnothing 50 μ m
- **CLASSIC POLYESTER** (4 dtex) \varnothing 19 μ m
- **COTTON** (3,2 dtex) \varnothing 16,5 μ m
- **SILK** (1,17 dtex) \varnothing 12,9 μ m
- **POLYESTER MICROFIBER** (0,78 dtex) \varnothing 8,5 μ m
- **POLYESTER MICROFIBER** (0,56 dtex) \varnothing 7,2 μ m
- **POLYESTER MICROFIBER** (0,30 dtex) \varnothing 5,3 μ m
- **MICROFIBER 80/20** (0,20 dtex) \varnothing 4,4 μ m
- **MICROFIBER 70/30** (0,15 dtex) \varnothing 3,8 μ m
- **SPIDER SILK** (0,14 dtex) \varnothing 3,6 μ m

If compared with classic fibers, the microfibre has a higher **MECHANICAL CAPACITY** on dirt removal: **ITS HIGH DENSITY ALLOWS IT TO REMOVE ANY TYPE OF DIRT.**

DENSITY

THE HIGHER THE DENSITY, THE HIGHER THE ABSORBING CAPACITY.

The fibers number per square centimeter denotes a microfibre's excellent cleaning performance.

From 100.000 to 250.000 fibers, this high number of fibers reflects high quality and high performances.

The weaving of the microfibre creates a network of free space, **AN EXTENSIVE NETWORK**, whose density allows it to absorb superficial dirt faster.

Classic Fiber

Microfiber

BENEFITS

CLEANING

Very strong cleaning power and highly effective on micro dirt **even without detergents.**

SAVING

Saves time and labor (minimum 30%) thanks to its extreme lightness and cleaning ability. **Excellent quality/price ratio.**

USE

It can be used on all surfaces **even those that are more delicate.**

LONG LASTING

Microfibre can be **regenerated several times** with a simple washing (manual or in the washing machine) keeping its characteristics unaltered.

RESULT

Very absorbent compared to traditional fibers and dries quickly.

ENVIRONMENT

Saving water and quantity of chemical product, **reducing the environmental impact.**

TIPS LAUNDERING INSTRUCTIONS

01 WASH AT HIGH TEMPERATURE

[194° F / 90° C if requested].

02 WASH WITH OTHER MICROFIBER PRODUCTS.

For best results keep them separate from other textiles.

03 DO NOT USE BLEACH

as it may shorten fibers life.

04 DO NOT USE FABRIC SOFTNER

as it tends to take away the positive charge.

05 DO NOT USE CHLORINE

06 TUMBLE DRY IF NECESSARY

But if possible leave it dry naturally.

07 "CONTROLLED" ENVIRONMENTAL IMPACT

Also available microfibre coming from post-consumer PET recycling (Re-Mop).

MAX WASHING TEMPERATURE 90° C

DO NOT USE BLEACH

USE TUMBLE DRYER

WHAT IS TRIOMOP?

IPC designs and produces cleaning solutions based on the consumers real needs, solutions granting extraordinary results.

TRIOMOP, THE NEW PATENT MOP REPLACEMENT

allows the user to perform three operations using just one mop which is divided into three sections.

Extremely easy and economic, Triomop is made of 3 sides of different materials (microfibers or cotton) to meet different requirements and result levels.

By varying the materials of the mop replacement, i.e. microfiber and cottonpolyester (open-end or looped), the mop washes and dries "simultaneously".

**BY USING ONLY ONE MOP
YOU CAN COVER THREE TIMES
THE SURFACE,
INCREASING ITS VERSATILITY.**

ADVANTAGES

- **EXCELLENT CLEANING RESULTS**
in removing both loose and attached dirt
- **VERY HIGH COVERAGE**
in terms of surface area (more than 40 m²)
- **UNIFORM DISTRIBUTION**
of detergents and reduced drying time
- **ERGONOMIC**
lightweight for a smooth operation
- **UNIVERSAL**
adaptable to all mop frames currently on the market
- **ENVIRONMENTALLY FRIENDLY**
an efficient mop reduces detergent use with better results
- **EXCELLENT PRICE-QUALITY RATIO**
essentially, 3 mops for the price of 2

TYPES and MEASUREMENTS

- **WITH POCKETS (40X13 - 50X17 CM)**
- **WITH HOOK AND LOOP FASTENERS (40X13 CM)**

(Mops of any personalized size or measurements are available upon request)

TESTED BY:

FIGR Istituto di Ricerca e di Controllo per Facility Management GmbH

HOW TO USE TRIOMOP?

SIDE C

SIDE B

SIDE A

METHOD OF USE 1

(for normal cleaning operations)

PHASE 1

During the cleaning process, side A of the mop ensures a greater degree of contact between the mop and the surface to be cleaned, allowing a more effective collection of dirt. At the same time, part B (microfiber cloth) collects dirt residue while absorbing both the cleaning product and the excess of moisture.

PHASE 2

After folding back side B, the cleaning procedure continues by refinishing the surface using side C, leaving the floor perfectly dry and streak-free.

METHOD OF USE 2

(cleaning particularly dirty surfaces)

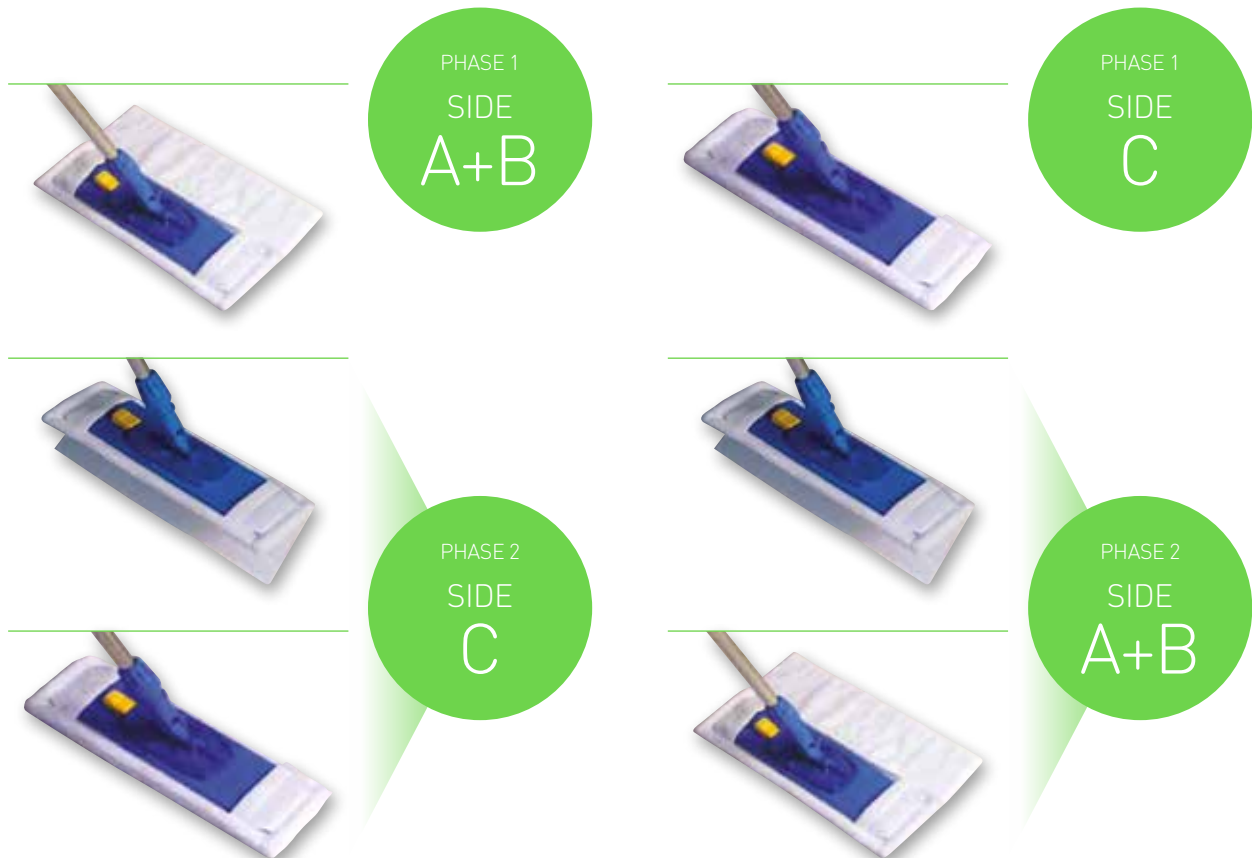

PHASE 1

Start with the mop in a folded position so that only side C is used. Proceed with cleaning until the entire surface to be cleaned has been covered.

PHASE 2

Reposition the mop replacement by moving the handle upward, lift the frame and then push the mop to the floor so that both sides A and B are being used.

In addition to the cleaning performed by section A, part B (microfiber cloth) collects dirt residue while absorbing both the cleaning product and excess moisture.

CURVY

cleaning without efforts

CURVY

Curvy is the innovative ultra-fast floor cleaning system that makes cleaning faster, more ergonomic and more efficient.

The speed, ergonomics, lightness and sturdiness that feature Curvy, make it an essential tool for each operator.

Ergonomic

With the intuitive natural **S-shaped motion** of Curvy, the rotation of the wrist and arm is no more required and this allows to drastically reduce the strain placed upon the operator's shoulders, arms and wrists, otherwise present in traditional equipment, limiting the **Repetitive Strain Injuries (R.S.I.)**.

Curvy ensures the operator to adopt a correct posture and contributes to his well-being.

Available in two models:

- 01. Telescopic handle version
- 02. Three-pieces handle version

CLOTHS & SPONGES

Created for the “cleaning professional team” and not only, the “cloths & sponges line” consists in a wide range of high quality and professional products, satisfying many and different customers’ needs.

CLOTHS

BENEFITS

- **IDEAL FOR EVERY TYPE OF SURFACES SUCH AS FOR EXAMPLE REFLECTING OR ROUGH ONES.**

The line of products has been split into 5 categories:

- **MICROFIBER**
- **MULTI - PURPOSE**
- **FLOORS**
- **WINDOWS**
- **COMPOSTABLE**

METHOD OF USE

PHASE 1

Choose the color of the cloth according to the cleaning operation and area.

Folding the cloth in 4 sections obtaining 8 damp surfaces in order to use the most of it.

PHASE 2

Spray the solution on the cloth.

Humidify the entire surface of the cloth, both sides.

IT IS PREFERABLY spraying the solution directly on the cloth and not on the surface (unless there are special stains).

At the end, wash the clothes and put them to dry.

MICROFIBRE CLOTHS SHOULD BE WASHED IN THE WASHING MACHINE AT HIGH TEMPERATURE WITH THE APPROPRIATE CLEANER.

MICRO SILVER

Various preventative measures based primarily on cleaning and disinfection operations are put into effect in order to limit the risk of bacteria cross-contamination and the spreading of infection.

While these methods are effective in reducing risk, their effect is only temporary and the formation of colonies of bacteria remains a real threat. In this context, antimicrobial materials have recently been introduced - a real innovation in both the prevention and management of risk situations in areas with bacteria contamination risk.

WHAT IT IS

MICRO SILVER is a microfiber cloth treated with an antimicrobial material based upon silver ion nanotechnology, a method new to the cleaning sector, but with amazing potential.

HOW IT WORKS

The silver ions have a strong oxidizing power: they destroy bacteria and fungi by oxidizing the cellular membrane and inhibiting the development of pathogens, thus limiting the transfer of bacteria from one area to another.

RESULTS

This method guarantees the nearly complete destruction of all bacteria trapped within the cloth after 10 minutes. Its antibacterial qualities remain effective, even after 500 washes.

WASTE COLLECTION RANGE

LINEN

LINEN is a line of trolleys designed and built specifically for the collection of dirty linen which can be also used for waste collection.

LINEN is ideally suited in healthcare sector thanks to the Rilsan treated metal frame or in the hospitality industry and community.

The main characteristic is the modularity: each trolley, mounted on 4 rubber wheels Ø 80 mm. (nylon fork) and bumpers, is complete with a foot operated mechanism to open the lid for maximum hygiene and can be easily coupled to another equal with 2 screws, to form combinations suited to meet any collection need.

The cover, as the bag (capacity 70 lt., in plastic canvas or polyester for washing) resting on polypropylene plate for maximum stability, is available in different colors.

USING THE DOUBLE BUCKET FEATURES

avoids the dirty mop/fringe to be wringed into the clean solution bucket.

A variant of this trolley is the **SINGLE BUCKET** on wheels trolley. As the word, the single bucket on wheels is simply a bucket (of consistent thickness) on which the wheels are screwed directly on and where to put the wringer, without chassis.

Recently, the single bucket on wheels trolley has **EVOLVED INTO A DOUBLE SECTION** for an effective separation of dirty water from clean one and often well equipped with a drain plug in order to easily empty the dirty water.

THE FREQUENCY OF THE CHANGE DEPENDS ON THE FLOOR SOILING.

METHOD OF USE

PHASE 1

Fill the grey bucket with water up to 2/3, fill the red bucket with water up to 1/3; pour into the blue bucket the correct dose as recommended on the chemical label.

PHASE 2

Soak the mop into the blue bucket to absorb the solution.

PHASE 3

Introduce mop in the wringer and slightly wring it.

PHASE 4

Proceed with the cleaning operation on the floor with the mop, making sure it adheres well to the surface, walking backwards with "S" shape movements.

PHASE 5

Soak the mop into the red bucket, to dilute the accumulated dirt.

PHASE 6

Wring the mop to eliminate as much as possible water and dirt, which will be deposited in the red bucket.

PHASE 7

Dip the mop into the blue bucket to absorb a sufficient amount of solution and repeat cleaning operations, starting from **STEP 4**.

PT SYSTEM

PRE-TREAT MOPS CLEANING SYSTEM

The IPC's PT (pre-treat) System is a cleaning and sanitisation system which revolutionizes the manual floor cleaning concept by using pre-treat looped end yarn microfibre mops.

With this cleaning system the mops are prepared at least 4 hours beforehand, by impregnating them with a solution of water and detergent making them ready to be used.

MOP PREPARATION

PHASE 1

Place the 20 microfibre mops to treat in the blue 22 lt. bucket, being sure the bucket is perfectly clean and odourless.

PHASE 2

Pour the water and detergent solution. Over the mops in the correct quantity. For 20 mops, it is usually enough 1,5 lt. of solution.

PHASE 3

Close the 22 lt. bucket with the lid. Turn the 22 lt. bucket containing the clean mops and the detergent solution upside down and leave the mop in the bucket for at least 4 hours.

In this way all the mops WILL BE impregnated by osmosis.

BENEFITS

- **REDUCES WORKING TIMES**

as the mops are ready to be used and the operator does not have to fill buckets, wring mops or dilute products during cleaning.

- **SPEEDS UP**

any type of manual cleaning of floors etc.

- **EASY TO USE:**

the operator has mops ready to be used and once he arrives on site with the service trolley he can start cleaning straight away using a mop for each room.

- **MOPS CAN BE REUSED UNTIL WORN:**

the pre-treat mops can be used even 7-10 days after preparation, as long as the bucket is sealed at the end of work; this means that they can **BE EASILY TRANSPORTED IN THE BUCKET FROM ONE SITE TO ANOTHER FOR SEVERAL DAYS.**

BRIX HOTEL

BENEFITS AND FEATURES

FOLDING BAG SUPPORT

- ▶ **Maximum compactness:** ideal in places where a small trolley is required without renouncing the complete service
- ▶ **Space saving:** allows a reduction of 210 mm of the overall dimensions of the bag holder
- ▶ **Strong:** guarantees solidity and robustness to the entire trolley

WHEELS

- ▶ **Maximum smoothness:** thanks to the ball bearings which means less effort from the operator while moving.
- ▶ **More accurate directionality:** the wheels support the direction to the trolley with little steering effort
- ▶ **Easy steering:** double ball bearing swivel head that considerably reduces the effort required by the operator
- ▶ **Quiet running:** thanks to the materials used and the high quality bearings that make the wheels silent on each surface
- ▶ **Low vibration:** soft compounds with good dampening properties
- ▶ **Non-staining and non-marking:** they do not stain on contact with floors during long standing periods

DOORS

- ▶ **Impact resistant:** withstands impact with blunt objects without damage
- ▶ **Resistant to wear:** their density makes them resistant to scratches
- ▶ **Resistant to light:** they do not suffer from UV ray damage and are not subject to discoloration
